

AI Use-Case Intake & Registration Form

Meridian National Bank — Model Risk Management Form MRM-INT-01 · Submitted by first line ·
Reviewed by second line

Complete before validation and before production use. This record creates the inventory entry and drives risk tiering.

Section A — Identification

Field	Entry
Use-Case ID	UC-2088
Use-Case Name	Small Business Credit Memo & Adverse-Action Drafting Assistant
Foundation Model (shared component)	FM-0007 — Anthropic Claude via Amazon Bedrock
Use-Case Owner (first line)	VP, Small Business Lending
Business Sponsor / LOB	Small Business Lending
Developer	In-house (Small Business Lending, with contractor support)
Vendor vs. In-house	In-house application on third-party foundation model
Submission date	Current cycle
Development status	Piloting in production (limited rollout already live)

Section B — Purpose and Use

Field	Entry
Model Purpose / Intended Use	Drafts the credit rationale / memo for small-business loan applications and generates adverse-action notice language when an application is declined. Output is placed into the credit file and, for declines, adapted into customer-facing notices.
Restrictions on Use	Intended that a loan officer reviews each draft before use.
Model Type / Methodology	LLM; prompts include application data and a rationale template
Decision made by the system	Drafts the decision rationale and adverse-action language that supports and documents the credit decision

Section C — Data

Field	Entry
Data Sources	Loan application data, applicant financials, credit-bureau summary fields, internal templates
PII / Consumer Data Flags	Yes — PII and consumer credit data included in prompts (applicant identity, financials, bureau data)
Data residency	Bedrock in-region; provider no-training terms assumed but not confirmed for the credit-bureau data class

Section D — Risk Context (drives tiering)

Field	Entry
Consumer impact	High — supports consequential credit decisions and generates adverse-action content sent to applicants
Autonomy / human-in-the-loop	Loan officer review intended, but drafts are frequently accepted with limited edits under volume pressure
Reversibility	Low — rationale enters the credit file; adverse-action notices are sent to customers
Regulatory application	Fair lending (ECOA/Reg B), adverse-action (FCRA), UDAAP exposure
Materiality	High
Proposed Risk Tier	Submitted as "Tier 2"; MRM to confirm

Section E — Attached Evidence

- `evidence-known-limitations.md` — open items / self-identified gaps
- Foundation model card (Anthropic system card) — on file
- *No DPIA, bias testing, monitoring plan, grounding controls, or validation report attached at submission.*

Section F — Owner Attestation

Owner attests the description is accurate and that a loan-officer review step is in place. Owner notes that formal testing and documentation are "planned but not yet complete." Signed: VP, Small Business Lending.
